

PERSONAL STATEMENT

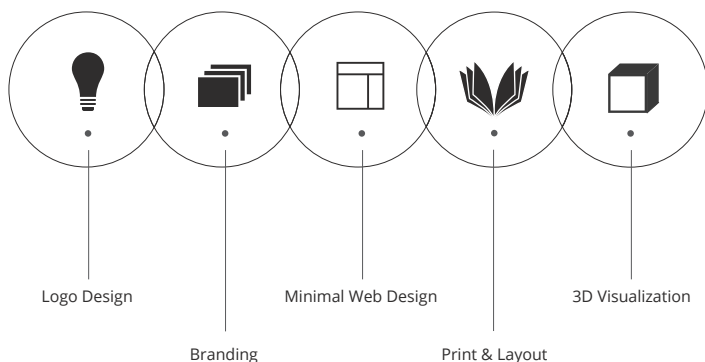

I'm a designer and 3D artist from Kansas City. I fell in love with graphic design while attending the Blue Valley Center for Advanced Professional Studies (CAPS). While there I learned the necessary software, business skills, and professionalism that has greatly shaped the path I've taken to succeed in this career field. I've had the pleasure of working with businesses within my area, which has provided me with a platform to construct and create solutions to the obstacles many face in trying to improve the experiences of their customers. A designer by day, I'm also a skeptical coffee drinking video game fanatic by night. I'm passionate about creating logical and beautiful solutions that many of us face in the pursuit of our dreams.

I simply love making beautiful things.
